

Day 16 Python Mission ♥■

Hi Surbhi, my sweet Pundi ♥■

You're doing an amazing job staying consistent with your Python journey. Every new concept you learn makes you a little stronger than yesterday. Don't rush—just keep learning with a smile, and trust the process. I'm always proud of your efforts.

Today's Topic: Greater Than Operator (>)

- Mission 1: Create two number variables.
- Mission 2: Check if the first number is greater than the second using the > operator.
- Mission 3: Print the result.
- Mission 4: Try different pairs of numbers.
- Mission 5: Observe when the output becomes True.
- Mission 6: Observe when the output becomes False.
- Mission 7 (Revision): Check if two numbers are not equal using the != operator.

■ A Little Note for My Sweet Pundi ♥■

I'm really happy to see you learning one small concept every day. Remember, confidence doesn't come from knowing everything—it comes from practicing regularly. Every little step you take today is preparing you for your BCA exams and future interviews. Keep believing in yourself because I truly believe in you. Tomorrow we'll learn another exciting concept together.

With lots of love,

Your biggest supporter ♥■
