

Day 23 Python Mission ♥■

Hi Surbhi, my sweet Pundi ♥■

You're doing a fantastic job staying consistent with your Python practice. Every new topic you learn is sharpening your thinking skills. Keep enjoying these small daily missions—they're preparing you for much bigger achievements in the future. I'm always proud of you!

Today's Topic: Introduction to if Statement

- Mission 1: Create a number variable.
- Mission 2: Write an if statement with one simple condition.
- Mission 3: Print a message only when the condition is True.
- Mission 4: Change the variable value and observe the output.
- Mission 5: Try another condition using a different number.
- Mission 6: Print a different message when the condition becomes True.
- Mission 7 (Revision): Use the 'not' operator with a comparison expression.

■ A Little Note for My Sweet Pundi ♥■

Today you're beginning one of the most exciting parts of Python—making decisions with code. Don't worry if it feels new at first. Learn patiently, practice a little every day, and trust yourself. Every small concept you master is bringing you closer to becoming a confident programmer. I'll always be here to encourage you and celebrate your progress.

With lots of love,

Your biggest supporter ♥■
