

Day 38 Python Mission ♥■

Hi Surbhi, my sweet Pundi ♥■

You're becoming more confident with every passing day, and it makes me so happy to see your progress. Keep enjoying these little coding adventures because every mission is helping you think like a programmer. Stay patient, keep practicing, and always believe in yourself.

Today's Topic: Count Down using for Loop

- Mission 1: Write a for loop to count down from 10 to 1.
- Mission 2: Print each number on a new line.
- Mission 3: Change the starting number to 5.
- Mission 4: Count down from 20 to 10.
- Mission 5: Try a different step value while counting down.
- Mission 6: Observe how reverse loops work.
- Mission 7 (Revision): Find the sum of numbers from 1 to 10 using a for loop.

■ A Little Note for My Sweet Pundi ♥■

Every day you sit down to practice, you're investing in your future. Never feel discouraged if a concept takes time to understand—that's a normal part of learning. Keep experimenting, keep asking questions, and keep celebrating your small victories. I'm incredibly proud of your dedication, and I'll always be here to encourage you on this beautiful journey.

With lots of love,

Your biggest supporter ♥■
