

Day 39 Python Mission ♥■

Hi Surbhi, my sweet Pundi ♥■

You're making wonderful progress every single day! The confidence you're building now will help you solve much bigger problems in the future. Keep enjoying your coding journey, stay curious, and remember that every small practice session matters.

Today's Topic: Factorial of a Number using for Loop

- Mission 1: Ask the user to enter a number.
- Mission 2: Convert the input into an integer.
- Mission 3: Create a variable to store the factorial result.
- Mission 4: Use a for loop to calculate the factorial.
- Mission 5: Print the final factorial.
- Mission 6: Test your program with different numbers.
- Mission 7 (Revision): Write a program to count down from 10 to 1 using a for loop.

■ A Little Note for My Sweet Pundi ♥■

I'm so proud of the effort you've been putting into learning Python. Every new challenge you complete is making your problem-solving skills stronger. Don't be afraid if something feels difficult at first—practice and patience will always help you improve. Keep believing in yourself, keep coding with a smile, and know that I'll always be here cheering you on.

With lots of love,

Your biggest supporter ♥■
