

Day 56 Python Mission ♥■

Hi Surbhi, my sweet Pundi ♥■

You've completed eight wonderful weeks of learning Python! Your consistency is becoming your greatest strength. Every day you practice, you're building confidence that will help you in your BCA exams and future interviews. Keep enjoying the journey—I'm always proud of you.

Today's Topic: String Repetition using * Operator

- Mission 1: Create a string variable.
- Mission 2: Print the string three times using the * operator.
- Mission 3: Print another string five times.
- Mission 4: Try different repetition values.
- Mission 5: Create a short pattern using repeated strings.
- Mission 6: Observe how string repetition changes the output.
- Mission 7 (Revision): Join two strings using the + operator.

■ A Little Note for My Sweet Pundi ♥■

Eight weeks ago, you began this journey with curiosity, and today you've already learned so many important Python concepts. Be proud of your dedication because showing up every day is a huge achievement. Keep experimenting, keep asking questions, and never be afraid of making mistakes—they're part of becoming a great programmer. I'll always be here supporting you through every milestone.

With lots of love,

Your biggest supporter ♥■
