

Day 59 Python Mission ♥■

Hi Surbhi, my sweet Pundi ♥■

You're getting stronger with every single day of practice. It's wonderful to see your consistency and determination. Keep enjoying these daily missions because each one is helping you build the confidence and skills needed to become a great programmer.

Today's Topic: Common String Methods: `replace()`

- Mission 1: Create a string variable with a simple sentence.
- Mission 2: Use `replace()` to change one word in the sentence.
- Mission 3: Print the original string.
- Mission 4: Print the updated string.
- Mission 5: Try replacing a different word.
- Mission 6: Observe that the original string does not change.
- Mission 7 (Revision): Remove extra spaces from a string using `strip()`.

■ A Little Note for My Sweet Pundi ♥■

Today you're learning another useful string method that you'll use in many real-world programs. Changing parts of a string is a common task in Python, and every little concept you master makes you a more confident programmer. Keep practicing with patience, stay curious, and never stop believing in yourself. I'm so proud of your dedication, and I'll always be here cheering you on through every step of this beautiful journey.

With lots of love,

Your biggest supporter ♥■
