

Day 11 Python Mission ♥■

Hi Surbhi, my sweet Pundi ♥■

Great job completing your first ten days! Every day you sit down to learn, you're becoming a little more confident. I'm proud of your consistency and courage. Keep enjoying this journey—one tiny step at a time, and never stop believing in yourself.

Today's Topic: Modulus Operator (%)

- Mission 1: Create two number variables.
- Mission 2: Find the remainder using the modulus (%) operator.
- Mission 3: Try different numbers and observe the remainder.
- Mission 4: Check the remainder when a number is divided by 2.
- Mission 5: Print the remainder for another pair of numbers.
- Mission 6: Experiment with bigger numbers and observe the output.
- Mission 7 (Revision): Create two variables and print their addition.

■ A Little Note for My Sweet Pundi ♥■

I'm so happy to see you learning something new every single day. Don't worry about making mistakes—they're part of becoming a great programmer. Keep practicing with a smile, stay curious, and remember that every small effort matters. I believe in you, and I'll keep cheering for you through this journey. Tomorrow is another exciting step toward your dreams.

With lots of love,

Your biggest supporter ♥■
