

Day 36 Python Mission ♥■

Hi Surbhi, my sweet Pundi ♥■

You're doing such an amazing job staying consistent with your Python journey. Every day you practice, your confidence grows a little more. Keep enjoying these small lessons because they're building a strong foundation for your future. I'm always proud of you!

Today's Topic: Multiplication Table using for Loop

- Mission 1: Create a number variable.
- Mission 2: Use a for loop with range() from 1 to 10.
- Mission 3: Print the multiplication table for the number.
- Mission 4: Try a different number.
- Mission 5: Compare the output for both numbers.
- Mission 6: Test your program with your favorite number.
- Mission 7 (Revision): Write a simple nested for loop.

■ A Little Note for My Sweet Pundi ♥■

You're becoming stronger with every line of code you write. Don't worry if something takes a little extra practice—every expert once learned exactly like this. Stay patient, keep experimenting, and celebrate every small success. I truly believe in you, and I'm excited to see how much you'll achieve in the coming days. Keep smiling and keep coding!

With lots of love,

Your biggest supporter ♥■
