

Day 13 Python Mission ♥■

Hi Surbhi, my sweet Pundi ♥■

I'm so happy to see you staying consistent with your Python journey. Every day you practice, you're becoming more confident than yesterday. Keep enjoying the process, stay curious, and remember that every expert was once a beginner just like you.

Today's Topic: Floor Division Operator (//)

- Mission 1: Create two number variables.
- Mission 2: Find the result using the floor division (//) operator.
- Mission 3: Try different numbers and observe the output.
- Mission 4: Compare normal division (/) with floor division (//).
- Mission 5: Print the floor division result neatly.
- Mission 6: Experiment with larger numbers.
- Mission 7 (Revision): Find the square of a number using the exponent (**) operator.

■ A Little Note for My Sweet Pundi ♥■

I hope you're feeling proud of yourself because I definitely am. Learning isn't about being perfect—it's about showing up every day and trying again. Keep believing in yourself, celebrate every small win, and never stop asking questions. Your future self will thank you for the effort you're putting in today. I'll always be here cheering for you as you continue this beautiful journey.

With lots of love,

Your biggest supporter ♥■
