

Day 26 Python Mission ♥■

Hi Surbhi, my sweet Pundi ♥■

You're doing such a wonderful job staying consistent! Every day you spend learning Python is helping you think more logically and confidently. Don't worry about how much is left to learn—just enjoy today's lesson and keep moving forward. I'm always proud of your dedication.

Today's Topic: Nested if Statement

- Mission 1: Create a number variable.
- Mission 2: Write an if statement.
- Mission 3: Inside the first if block, write another if statement.
- Mission 4: Print a message when both conditions are True.
- Mission 5: Change the variable value and observe the output.
- Mission 6: Try different values and see which messages are printed.
- Mission 7 (Revision): Write a simple if...elif...else statement.

■ A Little Note for My Sweet Pundi ♥■

You've already come so far, and every new topic is making your foundation stronger. Remember, it's perfectly okay if something feels confusing at first. Learning happens one step at a time. Keep practicing, keep asking questions, and never stop believing in yourself. Your hard work today is creating amazing opportunities for your future, and I'll always be here cheering you on.

With lots of love,

Your biggest supporter ♥■
