

Day 32 Python Mission ♥■

Hi Surbhi, my sweet Pundi ♥■

You're doing an amazing job learning one concept at a time. Your consistency is your biggest strength, and every day you practice, you're becoming a more confident programmer. Keep smiling, enjoy today's missions, and remember that every little effort matters.

Today's Topic: Using range() with for Loop

- Mission 1: Write a for loop using range(5).
- Mission 2: Print numbers from 1 to 10 using range().
- Mission 3: Change the starting number and observe the output.
- Mission 4: Change the ending number and observe the output.
- Mission 5: Print only numbers from 5 to 10.
- Mission 6: Experiment with different range() values.
- Mission 7 (Revision): Print your name 3 times using a for loop.

■ A Little Note for My Sweet Pundi ♥■

You're proving that small, consistent efforts create big results. Don't worry if a topic takes a little extra practice—that's completely normal. Every exercise you complete is making your thinking sharper and your confidence stronger. Keep believing in yourself, keep practicing with patience, and never stop being curious. I'm always proud of you and I'll always be cheering you on.

With lots of love,

Your biggest supporter ♥■
