

Day 20 Python Mission ♥■

Hi Surbhi, my sweet Pundi ♥■

Twenty days of learning—what a wonderful achievement! Your consistency is becoming a habit, and that's the secret to mastering any skill. Keep enjoying these small daily missions because they're preparing you for a bright future. I'm always proud to see you grow.

Today's Topic: Logical AND Operator (and)

- Mission 1: Create two comparison expressions.
- Mission 2: Use the 'and' operator to combine both expressions.
- Mission 3: Print the result.
- Mission 4: Change one value and observe the output.
- Mission 5: Make both expressions True and check the result.
- Mission 6: Make one expression False and observe the output.
- Mission 7 (Revision): Check if one number is less than or equal to another using the <= operator.

■ A Little Note for My Sweet Pundi ♥■

I'm incredibly happy to see you reach Day 20. Every lesson you complete is proof that you're stronger than yesterday. Never think your efforts are too small—they're building the confidence and skills you'll use for years to come. Keep asking questions, keep practicing, and most importantly, keep believing in yourself. I'll always be here cheering you on, one day at a time.

With lots of love,

Your biggest supporter ♥■
