

Day 33 Python Mission ♥■

Hi Surbhi, my sweet Pundi ♥■

You're doing such a wonderful job staying consistent. Every lesson you complete is making programming feel more natural. Keep practicing with patience, enjoy today's missions, and remember that every small step is taking you closer to your goals.

Today's Topic: Step Value in range()

- Mission 1: Write a for loop using range() with a step value.
- Mission 2: Print even numbers from 2 to 10.
- Mission 3: Print odd numbers from 1 to 9.
- Mission 4: Change the step value and observe the output.
- Mission 5: Print numbers from 10 to 20 with a step of 2.
- Mission 6: Experiment with different step values.
- Mission 7 (Revision): Print numbers from 1 to 10 using range().

■ A Little Note for My Sweet Pundi ♥■

Every day you learn something new, you're becoming more confident than yesterday. Don't be afraid to experiment with your code because that's how real learning happens. Stay curious, keep practicing, and celebrate every little success along the way. I'm proud of your dedication and excited to see how much you'll grow. Tomorrow is another opportunity to shine.

With lots of love,

Your biggest supporter ♥■
