

Day 35 Python Mission ♥■

Hi Surbhi, my sweet Pundi ♥■

You've completed five wonderful weeks of learning Python! I'm incredibly proud of your consistency and determination. Every small mission you complete is making you a stronger programmer. Keep enjoying the journey, trust yourself, and remember that every day you practice is a step toward your dreams.

Today's Topic: Nested for Loop (Introduction)

- Mission 1: Write an outer for loop.
- Mission 2: Add another for loop inside the first loop.
- Mission 3: Print a simple message from the inner loop.
- Mission 4: Observe how many times the inner loop runs.
- Mission 5: Change the range values and compare the output.
- Mission 6: Experiment with different loop counts.
- Mission 7 (Revision): Print numbers from 10 to 1 using a for loop and range().

■ A Little Note for My Sweet Pundi ♥■

Five weeks ago, you started this journey with curiosity, and today you're learning concepts that many beginners find exciting. Keep believing in yourself, because every line of code you write is making you more confident. Don't be afraid of mistakes—they're part of becoming a great programmer. Keep smiling, keep practicing, and know that I'll always be here cheering you on every step of the way.

With lots of love,

Your biggest supporter ♥■
