

Day 37 Python Mission ♥■

Hi Surbhi, my sweet Pundi ♥■

You're doing an amazing job staying committed to your Python journey. Every small challenge you complete is making your logic stronger and your confidence higher. Keep learning with a smile, trust the process, and remember that I'm always proud of you.

Today's Topic: Sum of Numbers using for Loop

- Mission 1: Create a variable to store the sum.
- Mission 2: Use a for loop to count from 1 to 10.
- Mission 3: Add each number to the sum variable.
- Mission 4: Print the final sum.
- Mission 5: Change the ending number and observe the result.
- Mission 6: Try finding the sum from 1 to 20.
- Mission 7 (Revision): Print the multiplication table of a number using a for loop.

■ A Little Note for My Sweet Pundi ♥■

Every day you code, you're becoming better than yesterday. Don't focus on how much is left to learn—look at how far you've already come. Stay patient, enjoy solving small problems, and never hesitate to practice again and again. Your dedication will bring wonderful results, and I'll always be here to celebrate every milestone with you.

With lots of love,

Your biggest supporter ♥■
