

Day 40 Python Mission ♥■

Hi Surbhi, my sweet Pundi ♥■

Forty days of learning Python—what an amazing achievement! Your dedication and consistency are turning into real programming skills. Keep believing in yourself, enjoy today's practice, and remember that every small challenge you solve is preparing you for bigger success.

Today's Topic: Introduction to while Loop

- Mission 1: Create a counter variable.
- Mission 2: Write your first while loop.
- Mission 3: Print numbers from 1 to 5 using the while loop.
- Mission 4: Increase the counter after each loop.
- Mission 5: Change the ending number and observe the output.
- Mission 6: Print your name 5 times using a while loop.
- Mission 7 (Revision): Find the factorial of a number using a for loop.

■ A Little Note for My Sweet Pundi ♥■

Today you're starting another exciting chapter in Python by learning the **while** loop. Don't worry if it feels a little different from the **for** loop—you'll understand it with practice. I'm incredibly proud of the effort you've put in over these 40 days. Keep smiling, stay curious, and never stop believing in yourself. I'll always be here cheering for you through every step of this journey.

With lots of love,

Your biggest supporter ♥■
