

Day 43 Python Mission ♥■

Hi Surbhi, my sweet Pundi ♥■

You're doing such an incredible job staying committed to your Python journey. Every day you practice, your confidence grows and your logical thinking becomes stronger. Keep enjoying these small lessons, because they're preparing you for amazing opportunities in the future.

Today's Topic: Multiplication Table using while Loop

- Mission 1: Ask the user to enter a number.
- Mission 2: Convert the input into an integer.
- Mission 3: Create a counter starting from 1.
- Mission 4: Use a while loop to print the multiplication table up to 10.
- Mission 5: Increase the counter after each loop.
- Mission 6: Test the program with two different numbers.
- Mission 7 (Revision): Find the sum of numbers from 1 to 10 using a while loop.

■ A Little Note for My Sweet Pundi ♥■

I'm really proud of how patiently you're learning every single day. Remember, every small program you complete is another step toward becoming a confident programmer. Don't rush your journey—keep practicing, stay curious, and never be afraid to make mistakes. They are proof that you're learning and growing. I'll always be here to support and cheer for you.

With lots of love,

Your biggest supporter ♥■
